# ABOLISH FRONTEx

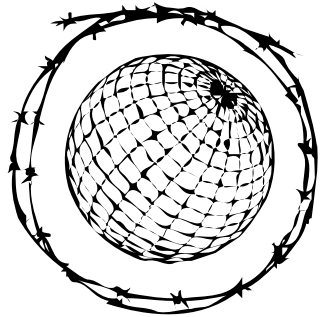

This summer we will organize a No Border Camp, somewhere in the Netherlands. A week of actions, networking, meetings and discussions about all aspects of repressive migration policies: detention of refugees, racist border controls, deportations, militarisation of borders, exploitation of migrant workers, etc. Also, to create connections with other areas of struggle, such as climate, anti-racism and anti-militarism. The international Abolish Frontex campaign is an important spearhead for the camp.

In the No Border Camp we want to bring the undocumented and the documented together. During the camp, interesting workshops are held and we discuss how we can all take a stand and organise resistance against the harsh Dutch and European migration policies.
